

Instructor checklist — Week 5, Day 1

Pack

- [] Slides: docs/slides/week-05-day-01.html
- [] Your backend health already returns 200
- [] Postman collection ready to project
- [] Printed lab sheets
- [] Week 4 leftover: who has no skeleton PR

Board

```
GET /health → 200 {"status":"ok","message":"Backend is running"}  
GET /api/hello → 200 JSON
```

```
stdlib: net/http ListenAndServe  
Gin:    gin.Default() GET c.JSON Run(":8080")
```

```
curl -i http://localhost:8080/health
```

Lab

Pair stuck with done. Typical: port in use, forgot `go get`, Postman hitting https by mistake.

Collect

#	Student	Health 200	Postman shot / PR	Notes
1				
2				
3				
4				
5				
6

12				
13				
14				
15				

After

- [] Message homework due date
- [] Spot-check 3 PRs: health JSON exact, README curl, no secrets
