

Week 7 troubleshooting

What they see	Cause	Fix
JSON shows FirstName	missing tags	add <code>`json:"first_name"`</code>
400 always on POST	trailing comma / wrong content-type	raw JSON; Content-Type application/json
empty list after create	wrote different map / restarted	same process; print len after create
404 for valid id	string vs int key	<code>strconv.Atoi(c.Param("id"))</code>
panic on bind	forgot <code>&req</code>	<code>ShouldBindJSON(&req)</code>
import models fail	wrong path	<code>student-management- system/internal/models</code>
order of GET list changes	map range	expected; sort by id if needed

Minimal create body

```
{
  "first_name": "Ada",
  "last_name": "Lovelace",
  "email": "ada@example.com",
  "phone": "07700000000",
  "course": "SE"
}
```
