

Week 7, Day 1 — presenter notes

Slides: [week-07-day-01.html](#) → F · arrows · N · P.

Structs, JSON tags, in-memory students. Create + list in lab. Update/delete homework. No JWT / Postgres.

Timing (3–3.5 hours)

Clock	Block	Slides
0:00–0:15	Week 6 handlers check	1–2
0:15–0:30	Outcomes + SE framing	3–4
0:30–1:15	Structs, tags, methods, embed light, interfaces, Reader	5–10
1:15–2:15	Store + POST/GET live + Postman	11–16
2:15–end	Lab create/list	17–end

Cut embedding live and generics-of-interfaces talk. Never skip 400 on bad JSON.

Live demo

1. `models.Student` with tags
2. Map store + `StudentHandler.Create / List / GetByID`
3. Postman POST → GET list → GET :id → bad JSON 400 → missing id 404

Lab gate

- [] POST creates (201)
- [] GET list shows it
- [] GET :id / 404
- [] Bad JSON → 400
- [] Health still green

Homework

PUT + DELETE. Invalid JSON → 400.

What not to teach

Postgres, JWT, repository extract (week 8), mutex deep dive.
