Troubleshooting — Week 9

Symptom	Likely cause	Fix
Missing id still 200 / empty	Repo returns zero value without error	Return `ErrNotFound`
Always 500 on missing	Not using `errors.Is`	Map sentinel before generic 500
`errors.Is` false after wrap	Used `%v` / `%s` instead of `%w`	`fmt.Errorf("...: %w", err)`
Panic in handler	`panic(err)` or nil deref	Return JSON; construct handlers
slog not JSON	Text handler / Println left	`slog.NewJSONHandler(os.Stdout, nil)`
Secrets in git	Committed `.env`	Delete from history discussion; gitignore; rotate secret
`godotenv` missing	Module not tidy	`go get github.com/joho/godotenv`

Room walk: ask “404 or 500?” for missing student — answer must be 404.
