

Pre-class (send 2–3 days before Day 1)

Copy, fill the date/room, send on WhatsApp / email.

Epic Learn — Go Programming Master Course — Week 1, Day 1

Please do these **before** you arrive so we can write code in class, not fight downloads.

1. Create a **GitHub** account: <https://github.com/signup>
Use an email you can open in the lab.
2. Install **Visual Studio Code**: <https://code.visualstudio.com>
(Lab PCs may already have it.)
3. Bring: laptop + charger. Lab is **Ubuntu**. Windows laptops will use **WSL2 + Ubuntu** — we will set Go there, not in PowerShell.
4. Do **not** `apt install golang-go` and do **not** install a random “Go” from the Microsoft Store. We install **Go 1.25** together from <https://go.dev/dl/>

Today's goal: toolchain + first program on GitHub. The Student Management System starts in **week 4**.

See you at [DATE] [TIME] [ROOM].

Umesh Indrajith · Epic Learn Education · 074 1200 659

If they ask “should I study?”

Optional only: <https://go.dev/tour/welcome/1> — stop after “Hello, World”. Do not skip ahead to methods.
