

Week 3, Day 1 — full kit

Everything needed to teach and sit Week 3. **No SMS code today.** Control flow, slices, maps, and just enough functions — with two labs and `go test`.

Print these (PDFs): [pdf/](#) — every page has the Epic Learn logo header and the footer *Epic Learn Institute of Higher Education - Go Programming Master Course*.

PDF	Use
week-03-day-01-slides.pdf	Projector / student copy of the deck
week-03-day-01-slides.pptx	Editable PowerPoint (text boxes + logo). Rebuild: <code>python3 docs/week-03-day-01/build_editable_pptx.py</code>
student-handout.pdf	Give every student
lab-sheet.pdf	Gate before they leave
worksheet.pdf	Control + slice gotcha + comma-ok (fill in class)
week-03-day-01-notes.pdf	Your script
troubleshooting.pdf	Walk the room
homework.pdf	After class — coding (8 functions + light algorithms)
pre-class.pdf	Send 2–3 days before
instructor-checklist.pdf	Packing + URL sheet

Regenerate on Ubuntu (PEP 668 — do **not** `pip install --user` into system Python):

```
sudo apt install python3-venv python3-full
# Google Chrome or Chromium must be on PATH (for PDFs)
./docs/week-03-day-01/generate.sh
```

PowerPoint only (no Chrome): `./docs/week-03-day-01/generate.sh --pptx-only`

Who	Open / print
Instructor presenting	../slides/week-03-day-01.html (F fullscreen, N notes, P PDF)

Who	Open / print
Instructor script	../slides/week-03-day-01-notes.md
Instructor packing + URL sheet	instructor-checklist.md
Night before	pre-class.md
Students (print)	student-handout.html
Students lab gate	lab-sheet.html
Students fill-in	worksheet.md
When something breaks	troubleshooting.md
Homework	homework.md
Reference only (after they type it)	starter/

Gate: nobody leaves without a filled worksheet, a paper test table for `contains`, and green `go test` on `Contains`, `Unique`, and `Freq`.
