

## Lab gate — Week 1, Day 1

Fill this and show it with your GitHub page before you leave. Name: \_\_\_\_\_

**You are done only when every box is ticked.**

- ☐ `go` version shows **go1.25.x** (not an apt 1.18/1.21)
- ☐ VS Code folder is `~/epic-go/hello` (or WSL equivalent)
- ☐ Go extension installed; save reformats a messy Go file
- ☐ `go run hello.go` prints Hello, Epic Learn
- ☐ `go build -o hello hello.go` then `./hello` prints the same
- ☐ GitHub repo has `hello.go` and `.gitignore`
- ☐ Compiled binary `hello` is **not** on GitHub

### GitHub URL

`https://github.com/yourname/hello-epic-learn`

### Paste go version output

`go version go1.25.x linux/amd64`

### Instructor sign-off

| Seen URL + version | Initials | Time |
|--------------------|----------|------|
|                    |          |      |

Homework still due before next class: why `-go.md` + version proof in the same repo.
