Lab gate — Week 11

Name: _____ · Pair: _____

1. Channels

- [ ] Can explain unbuffered vs buffered
- [ ] Know: only sender closes; never send on closed

2. Worker pool

- [ ] Fixed N workers (not go-per-job)
- [ ] Job channel + results channel
- [ ] WaitGroup before closing results
- [ ] `go test ./...` in worker-lab passes

3. Stretch (optional)

- [ ] Import sketched or started

```
cd docs/week-11-day-01/starter/worker-lab
go test ./...
go run .
```

Instructor sign-off: _____
