Week 11, Day 1 — presenter notes

Slides: `week-11-day-01.html` → **F** · arrows · **N** · **P**.

Channels, pipelines, worker pool. Lab = pool kata. Import API is stretch. Mutex fix still week 12.

Timing (3–3.5 hours)

Clock	Block	Slides
0:00–0:15	Week 10 check	1–2
0:15–0:30	Outcomes + SE	3–4
0:30–1:30	Channels, close, select, pipeline	5–9
1:30–2:30	Worker pool + WaitGroup + live	10–15
2:30–end	Lab kata / import stretch	16–end

Never skip the fixed-N pool. Cut import live if needed.

Live demo

1. Buffered channel + range
2. Worker pool hashing strings (`worker-lab`)
3. Optional: sketch `POST /api/students/import`

Lab gate

- [ ] Unbuffered vs buffered explained
- [ ] Pool with fixed N + job channel
- [ ] WaitGroup join before closing results
- [ ] No go-per-job

Homework

Import endpoint **or** documented kata in `internal/workers/`.

What not to teach

Mutex race fix, Postgres bulk copy, unbounded fan-out.
