Week 9, Day 1 — presenter notes

Slides: `week-09-day-01.html` → **F** · arrows · **N** · **P**.

Errors, wrapping, validation, slog, JWT preview. Lab: `ErrNotFound` → 404. Homework: slog + `.env.example`. Auth register is stretch.

Timing (3–3.5 hours)

Clock	Block	Slides
0:00–0:15	Week 8 repo check	1–2
0:15–0:30	Outcomes + SE framing	3–4
0:30–1:30	error, sentinel, wrap, HTTP map, validation, slog, config	5–11
1:30–2:00	Auth/JWT light + milestone	12–14
2:00–2:40	Live ErrNotFound + slog	15–16
2:40–end	Lab	17–end

Cut register live and JWT deep-dive if mapping eats time. Never skip 404 vs 500.

Live demo

1. Repo returns `ErrNotFound`; handler `errors.Is` → 404
2. Unexpected path → 500 + `slog.Error` JSON line
3. Optional: `POST /api/register` with bcrypt (no student-route lock)

Lab gate

- [ ] `ErrNotFound` + repo returns it
- [ ] Missing id → 404 JSON
- [ ] Unexpected → 500 + slog
- [ ] Bad JSON / bind → 400
- [ ] Health green

Homework

Replace `fmt.Println` with `slog`. Add `.env.example` + `internal/config`.

What not to teach

Postgres, full JWT middleware on students, panic-as-control-flow.
