Epic Learn — Go Programming Master Course — Week 4, Day 1

Bring a **green Week 3 homework test**. Today we start the Student Management System repo.

1. `go test` on your Week 3 `homework/` (or `slicekit/`) must pass.
2. Laptop + charger. **Ubuntu** or **WSL2 Ubuntu** — not PowerShell.
3. GitHub account ready; you will open a **pull request** in class.
4. Optional reading: [How to Write Go Code](#) (packages + modules). Stop before testing deep-dives.

Today's goal: `go mod init`, `internal/` layout, `cmd/server` prints `sms starting`, README + PR. **No HTTP / Gin yet** (week 5).

See you at [DATE] [TIME] [ROOM].
