Lab gate — Week 10

Name: _____ · Pair: _____

1. Goroutines

- [ ] Ran many-goroutine print demo (or instructor live)
- [ ] Can explain: `go f()` does not wait

2. Race detector

- [ ] `go test -race ./counter/` shows **DATA RACE**
- [ ] Did *not* "fix" with mutex yet (unless already known)

3. Fan-out

- [ ] `go test ./validate/` passes
- [ ] Can say when fan-out is overkill for SMS

4. SMS

- [ ] Create still synchronous (no naked go)
- [ ] Health 200

```
cd docs/week-10-day-01/starter/goroutine-lab
go test -race ./counter/
go test ./validate/
```

Instructor sign-off: _____
