Week 10, Day 1 — presenter notes

Slides: `week-10-day-01.html` → **F** · arrows · **N** · **P**.

Goroutines and the scheduler. See a data race. Fan-out validation kata. No channels. No mutex fix yet.

Timing (3–3.5 hours)

Clock	Block	Slides
0:00–0:15	Week 9 check	1–2
0:15–0:30	Outcomes + SE	3–4
0:30–1:30	Concurrency, go, GMP, leaks, handlers	5–9
1:30–2:15	Race preview + -race live	10–11, 14–15
2:15–end	Fan-out lab + quiz start	12–13, 16–end

Never skip `-race` red. Do not teach mutex fix today.

Live demo

1. Tiny `go say` / 10k prints
2. Shared counter → `go test -race` DATA RACE
3. Fan-out three validations in starter

Lab gate

- [ ] 10k (or similar) goroutine demo run
- [ ] `-race` red on counter lab
- [ ] Fan-out validate understood
- [ ] SMS create still sync + health green

Homework

Short quiz. Optional: race evidence on unsafe global map (fix week 12).

What not to teach

Channels, worker pools, mutex deep-dive, GOMAXPROCS tuning.
